CHRISTMAS GREETINGS FROM AMZ

### Festive greetings from AMZ

The special time is slowly approaching, the days are getting shorter and the holiday spirit is in the air. Your support, commitment and partnership have made this year very special. As the days get shorter, the design phase is slowly coming to an end.

This stage, full of creativity and planning, has allowed us to dive deep into our project. This milestone not only marks the end of the design phase, but also the beginning of an exciting production phase.

### Review

Many of the innovations and refinements we have developed over the last few months may not be obvious at first glance. We started this project with a clear goal in mind and started from scratch to create a vehicle that not only drives, but also wins. The last few intense months allowed us to grow together as a team and form new friendships. We have battled through countless concept ideas, challenges and tweaks.

All these efforts have borne fruit, even if it may not seem so at first glance, as we do not yet have a physical car. Nevertheless, a digital image of the car already exists, which serves as a solid foundation for a promising and successful season.

The Christmas period gives us an opportunity to look back on the past year. Time often seems to have passed much more quickly than we had planned. Despite the time that has passed so quickly, we have not only created a design but also a shared vision that drives us forward. The last few months have prepared us for the next step and our motivation remains unshaken.

### Outlook

The upcoming festive period will only be a short time of rest and relaxation for us. Soon all the technical drawings have to be converted into physical parts in order to create a car that can win races in the summer. There is a time ahead when we will utilise our manufacturing skills at the highest level. The project is no longer just on paper, but is turning into a physical reality. The first parts have already been laminated and many orders have been finalised. It is exciting

to see our plans taking shape and we are looking forward to the time ahead.

### Thank you!

The entire AMZ Racing team wishes you happy holidays, a wonderful time with your loved ones and, of course, a successful start to the new year. We look forward to starting the new year with you and your support, especially at this crucial stage of the project. We can hardly wait to inform you about our

production. We sincerely thank you and wish you a festive season.
